imports for the week up to the respectable sum of \$115,-000 at this port alone. The Consuelo bound to Kahului with a cargo valued at \$52,351.62 will make the total \$167,451.52, nearly all American products. The exports for the week, to the coast, by the J D Spreckels and W H

Meyer amount to \$96,010.84. Equiness in the United States is reported as "booming" and the influx of foreign gold assists to give a cheerful tone to business generally. The most remarkable thing connected with the continued arrival from Europe of such large sums, is that they have been without any corresponding increase in the exportation of blows hot and cold on the Royal Hawaiian America's two great commodities cotton and breadstuff. Planters' Association. An editorial par-From the first week of August to the end of the first week in October, American papers report that \$28,000,000

The general tone of the local financial market has not changed in any degree, and under existing circumstances is not likely to do so. Competition is the life of trade in financial as well as business circles, and a monopoly does not mean benefit to buyers or borrowers.

We append extracts from the usual monthly circular of Mesers, Williams, Dimond & Co, which that firm has kindly forwarded to us.

The trade sale at Messre. Geo. Macfarlane & Co's during the first of the week was well attended and \$18,-900 of goods were sold. Nine-tenths of the buyers were Chinese. The sale of liquors, &c, belonging to the estate of Chas. Long, was also well attended, and very

estate of Chas. Long, was also well attended, and very good prices were obtained by the auctioneer for the goods sold.—S F Oct 23, 1880.

Stoak—Since our last, Manila Extra Superior No. 1 Sugars have advanced to £17.5.0, making basis here \$6.59. Baw Sugars in New York weak; Cuba refinery grades 1% cents. Centrifigal No. 16—98 per cent, 8% cents. Our refineries are almost out of stock, having been disappointed in the receipts from the Islands for the last quarter. The prospects are that prices will rule low for next season's products, as the beet crops of Europe are very fine and the Louisiana crop is also above the average. It is not too late yet, however, for frosts in both continents to entirely change the present position. Continents to entirely change the present position.

Ercz-The jobbers are mostly carrying good stocks, which gives strength to the market, and the shipment

which gives strength to the market, and the shipment per Lady Lampson, now due, is sold to arrive at 61-8 cents with the exception of 200 bags now held at 6½ cents which price it will probably reach, unless large receipts follow soon after the arrival of the Lady Lampson. The receipts since January 1st to date are 46,570 bags, against 43,265 bags for the last year, showing an increase of supply for the year, probably, of 13,000 bags. There is apparently quite an increase of consumption.

Molasses—The Molasses coming to hand is taken quite readily at 20 to 22½ cents, and very choice will sell for 25 cents to some extent, for family use.

CONFIR—New York telegrams report an advance in that market of ½6½ cent per B, on Rio.

Whale Oil.—Sales of Arctic have been made at 37½ cents, but it is not well to expect even 35 cents for the remainder of the season, as the trade is supplied for

emainder of the season, as the trade is supplied for numediate wants. It went as low as 35 cents last Decem-WHALE BONE-The market of the world is easily over stocked with this article, compared with Whale Oil, and although nominally \$1.25 per lb, it is quite certain to go as low as \$1.00 in this market and perhaps in New York Walkus Tren-This article is in a different position from Whale Bone. The supply is more moderate com-pared with the demand, and 40 cents per lb, is a fair quotation, at which sales have been made. There is an quotation, at which sales have been made. There is an Asiatic demand as well as American and European.

THE PACIFIC Commercial Adbertiser

SATURDAY, NOVEMBER 6, 1880. OUR COTEMPORARY of last Wednesday tially approves; and certain communications criticize and condemn-and all the articles have the same inspiration of hostility to this, or any other enterprise, that proposes to go to British India for laborers or population. The communication "V. K." (doubtful initials) says that our Envoy Carter did not go to London, in 1878, "for any other purpose than the regulating the treaty clauses"-(V. K.'s italies). Saying furthermore, "there dwells in many minds an idea that the object of Mr. Carter's mission in that year was Indian coolies, when in fact it was nothing of the kind." But Minister Kapena says in his report in 1878 -"The Board (of Immigration) authorized him (Mr. Carter) to look thoroughly into the feasibility of an East Indian immigration, and if possible to make practical arrangements for putting it into operation. It was deemed desirable that an arrangement, or understanding, should be had with the British authorities by means of which the immigration would be facilitated, and placed upon a paying and permanent basis," And in confirmation of this, Mr. Carter says in his report on his mission: "and further, if it seemed practicable, to enter into a scheme of East Indian immigration." And we all distinctly remember the interest and co-operation of Mr. Carter in the famous memorial of 1876, which urged the importance of the "over-peopled plains of India" as our recruiting ground, which view Mr. Carter repeats in the "Report of the Royal Commission on the Development of the Resources of the Kingdom," recommending to bring into the kingdom a class of people who would bring their families, and assimilate with the Hawaiian race. Probably in India such could be found." And farthermore, Charles R. Bishop, Chairman Committee on Foreign Affairs, says in a report to the Legislature in 1878-"It is securing the emigration of a considerable

and was quite sanguine of success. Therefore, it is an unqualified misstatement, to speak of East India immigration as being no part of Mr. Carter's mission to London: and it is a disservice to that gentlemen to represent him, as not interested in, nor having any such purpose in view, in connection with his mission.

But the coarser writer about "Pro Tem" shows the animus of the sheet whose editor says, referring to many mean flings and innuendoes: "Our correspondent probably expresses the views of all the sugar planters who prefer to make their own plans, association, and officers. However, 'Pro Tem,' and the Cabinet, and the '\$5 by order' gentlemen may, as a little planters' association, go by themselves." And he might add,-" We don't go with this scheme proposed by 'our friend of the royal reserve,' or any other Britisher, however much we may need East Indians, or any other kind of British labor."

IN THE Y. M. C. A. page of the Friend of the present month, it is stated that "one of the most difficult of the problems in our island social and religious life, is the demon of feeling by the natives against

We would like to know how and when, and where this "social and religious demon" manifests itself. Is it in some exclusive native congregation, with whom a poor foreigner would not venture to sit? Or perhaps in native parlors, into which a diffident stranger is seldom or never invited to enter?

Or it may be in business or industrial enterprises that this demon appears, when a native tries to get a foreigner's labor for a bare modicum of food and clothing, whilst he enjoys the profits in stately mansions and foreign travel?

Or, as it is said, because the native is sometimes unwilling to submit his case to the adjudication or umpirage of the for-

Well, in that respect, when life, liberty, property or our good name are at stake, we all have our race prejudices, and all have a demon of feeling to exorcise. And the best of us sometimes may be unjustly accused of appealing to it.

We distinctly remember when Minister Green, now our Premier,-replying to certain memorialists, called attention to the absence of Hawaiian names from the memorial, that a hue and cry of antagoni-m of race was aroused; said to be "contemptible in a politician, but culpable, almost criminal in a minister." And at a meeting in the Lyceum at the time, in which Editor Hartwell took a prominent part, a resolution as follows was adopted, -"That no person is worthy the confidence of His Majesty who would oppose these objects (East India Immigration, by the way) or who would seek to plant the seeds of discord between the races and classes, (Mr. G. had said

rial) living under His Majesty's rule." prejudice, in which rousing we then took a serve whom is their only object. part along with brother Hartwell and others; and we now suggest to Y. M. C. A. to say no more about this demon, as it may appear to many that it is one of political prejudice which you ought to exorcise.

THE Honorary Secretary of the embryo Planters' Association did not receive an invitation to attend the meeting held vesterday at the office of the Minister of the Interior. Throughout the proceedings which chiefly consisted of a desultory conversation as to what had been done already to import laborers, not a word was said about the subject of Indian coolie labor. Apparently the object of the meeting was not in sympathy with any endeavor to procure Indian labor. As we have already said if planters think that the East Indies are a suitable source from which to procure labor, they must join together and take the matter in hand themselves. If they do so on a sufficiently large scale they will find the result remunerative as compared with the cost either of Portuguese, Norwegians, or South Sea Islanders. They will find no difficulties of a special nature in their way if they undertake this enterprise, and will succeed much better without the aid of the Government even if they could secure it.

WE ARE glad to be assured that W. N. Armstrong, Esq., will arrive here per December steamer, to undertake the duties of Attorney General. We have had the pleasure to meet this gentleman, and have observed that in personal intercourse and in his public discussion he appears a man of broad and generous views, and we feel assured will be a valuable addition to the personnel of the government.

OUR lawyer editor dodges the main issue on the "army" question, and tries a bit of cuttle-fish manœuvre to muddy the discussion by referring to our alleged wish for a military force, and desire "to curry fayor in certain quarters;" but everybody-remembers too distinctly all the poppy-cock of the Hartwell military organization and "general orders" of 1874, and the billies besides-to be blinded by this bit of special

IMMIGRATION MATTERS.

(Communicated.) We understand the Board of Immigration, owing ot the large amounts spent extravantly, or worse, upon old vessels, especially the Pomare, and other demands made upon them to carry out contracts entered into, find themselves short of funds to carry out their ideas, even as far as they wish to do. We all know the importance of this matter of immigration, especially of females, and it is of the utmost importance that this part of the duties of the Board should not be neglected wherever the funds come from. We have heard of the importance of a marine railway, in fact, this was urged upon a Committee of the last Legislature, as being of the greatest importance. Of late we have been asked how many vessels had gone away from here for repairs on account of not having such accommodations; we say we don't know, The querists say none. We have been asked how many steamers would have to go away from here for repairs on account of not having a Marine Railway; we replied that we did not know. We are told possible one, not more. We are asked how many people will be benefitted by a Marine Railway; we say we do not know. We are told one person, possibly two. If this is so, and we are told there are ten believe it is so to one who does not-we say to the Government you will be better serving the country by sending for European immigrants than putting \$100,000 into a Marine Railway.

BOARD OF IMMIGRATION. By invitation, a number of gentlemen known that Mr. Carter was very hopeful of interested in plantation investments met at the Government Buildings yesterday forenoon, and had an interview with the number of East Indians to these islands, Board of Immigration. About a dozen gentlemen, besides the members of the Board, were present. His Excellency the Chairman of the Board explained the arrangements and expectations of the Board, more especially with regard to immigration from the South Sea Islands. His remarks took the form, to some extent, of a defense of the South Sea scheme, and he expressed the belief that the difficulties hitherto experienced would be moderated as time went on. He gave reasons why the heavy death-rate of South Sea Islanders in the Hawaiian Islands should not be ooked upon as a normal condition of things, exceptional causes having been at play. If the Hawaii and Stormbird were moderately successful, 500 or 600 South Sea Islanders might be expected in four or six months from now. Besides these, some 400 Portuguese, about 600 Norwegians, and 100 Germans were expected during the same period. The Board was paying half the passages of the women, and the whole of the passages of the children included in the above numbers. The Board's finances would not allow them to enter into further. engagements of importance unless they got a larger reimbursement through the importation of South Sea Islanders than they at present ventured to expect. The Board would be glad of suggestions from those interested. Mr. Atherton, by request, explained the arrangements his firm had made for procuring the expected Norwegian immigrants. Mr. Pfluger urged that the Board should endeavor to procure further accessions from European countries to counterbalance the large number of Chinese who were coming. He gave statistics showing 1135 immigrants coming from Norway, Germany, and the Azores, of whom he estimated that perhaps 600 would be adult males-adding these to the 1900 Chinese expected, and say 500 South Sea Islanders, it appeared that something like 3000 would be added to our laboring population within six or eight months. Members of the Board thought that it would not do for the department to enter into liabilities for European immigrants beyond paying as heretofore, half the passages of women, and passages children. They had about \$20,000 available for this and for passages of Chinese women, if they could succeed in inducing them to come. Mr. Afong being appealed to, said he thought it would be difficult to get Chinese women. If they came, they would probably be "not nice women." He also, in reply to a question, expressed his belief that the rice plantations were already pretty fairly supplied, and that large ar-rivals of laborers would result in a break down of the present combination as to wages. It was finally agreed that the Board would receive applications from planters for Norwegian, German, or Portuguese immigrants; and, if properly guaranteed, act as the medium for procuring them. To the suggestion that this should be advertised, the chairman replied that it was sufficiently advertised already, as those present represented most of the planting interest. The

CORRESPONDENCE.

meeting then broke up.

We are not responsible for opinions expressed by correspondents, our columns being open to all for the discussion of public affairs from every point of view. Correspondents will please observe that all letters must be authenticated by the names of the writers, not necessarily for publication, but as a guarantee of good

To the Editor of the Pacific Commercial Advertiser. Sig.-The originators of the proposed National mechanics had been left out of the memo- Planters' Association appreciating the comments on the prospectus at its first issue, have in much So there was then a demon aroused, but esteem the suggestions and views it has elicited not by Mr. Green-a demon of political from the Press, and others of the community-to

From the necessarily hurried compilation of the prospectus a misappreciation of the organization has seemingly arisen, on which an explanation appears to be due, personal interviews being schools on Beretania Street, a practical proof of their seal for the cause of education in these islands. The Rev. Pather

The circular, as issued, is in view to elicit if possible suggestions from and expression of the requirements and sentiments, of those severally and generally interested in the " labour question' and as a basis for collective operation.

The subject being of National importance, the measure, in the opinion of the original committee. should take such direction as to include, and i possible meet, the requirements of all interested

in, or resident on Hawaiian soil. As justly remarked by the Gazette of 3rd inst. the measure is in "process of formation" onlyand so far this practically supplies a long expressed need. His Majesty the King has accorded his sanction, and patronage-and the countenance of gentleman of approved social status, having the confidence of the nation, has been given, the latter if eventually elected by the community, have courteously expressed their willingness to act, as officers of the association.

But, however faulty the construction. . Bis dat qui cito dat," and it would now seem to be time for others to give a helping hand by relief in. or from, an arduous if gratilying task.
I am sir, yours obediently.

H. VHALLEY NICHOLSON. Honolulu, Nov. 5, 1880.

To the Editor of the Pacific Commercial Advertiser Sin .- I think that it would be much better to construct a Graving Dock here than a Patent Slip, and beg to state a few reasons why such a work would promote commerce in various ways. By borrowing the money for a Dock in the

United States we should cement those relations

with that country which are the guarantee for the

prolongation and renewal of the Treaty. The

money would be well spent and remain in the

country where it would be again invested in other things, such as building houses and starting new plantations, The work would furnish employment for ships between here and San Francisco and would put money in circulation. Again it would bring men-of-war of all nationalities here, which would make up for the loss of the whaling fleet by the supplies they would require in the way of provisions, coat, etc. The fact of there being a Dock here and it being made known in the sailing directions would also bring ships here. The materials .for constructing same are at hand such as lumber for bullding a dam. The boiler, pumps. and pumping engine can be constructed here. All that would be required for the completion of same would be cement and provisions for the laborers which San Francisco would supply. Lastly perhaps the mail boat might be induced to lay up here to clean and paint; and finally the additional taxation would be borne in part by those employed on the work. The erection of a Patent Slip would not accommodate vessels of every class and would be an outlay without any corresponding

The stone removed from the Dock would pay to ballast ships and grade the streets and filling up the Esplanade.

(Communicated.) Mr. McCrindell, the Manager of the Hawaiian Investment and Agency Company received by last mail a telegram to the effect that the Company had been registered and that all the shares reserved for Great Britain had been taken up. As many of our merchants are aware the company has been formed in Dundee, Scotland, for the purpose of borrowing money on debentures in Great Britain to the extent of the uncalled capital, at moderate rates of interest, and investing it, along with the paid up capital, in sale securities in the Hawaiisn Islands. The capital of the company is £100,000 (\$500,000) of which £20,000 (\$100,000) is to be paid up, the remaining £80,000 (£400,000) being borrowed or debentures. The Local Advising Board consists of His Excellency W. L. Green, His Excellency H. A. P. Carter, His Excellency J. S. Walker and W. W. Hall, Esq. Three thousand shares, on which £1 (\$5) per share is to be paid up, have been received for sale in the Islands. and 2200 of these have already been subscribed for. Applications for the remaining 800 may be made to Mr. McCrindell, Queen street, and it is desired that they should, if possible, be taken up by residents on the other Islands so that the Local Board may have interested parties to apply to for information in-regard to the value of securities. The main business of the company will be lending ipon mortgage and it is hoped that soon after the arrival of next mail they will be in a position to commence operating.

DOCK OR SETP?-Our correspondent B, whose letter appears in this issue of the ADVERTISER, is urgent that the proper work to be undertaken here is a Graving Dock. His special preference for a dock seems to rest on the fact that the greater part of the cost would be spent on labor within the kingdom. and that in consequence less money would have to be sent abroad than in the case of a marine railway. There cannot be the least doubt that a great deal of money would be spent in Honolulu during the construction of a dock; much more than if we content ourselves with the slip at present proposed. But that would be because the one would cost much more than the other. The proportion of the money that would, in either case, go out of the country would probably not differ much. The one item of cement would in the case of a well constructed dock run to a very large figure. We believe in a good dock for Honolulu, but that it would be in the ordinary sense a paying investment, or that it is an investment within our present means, we are scarcely prepared

Still They Come !

About 2,000 Chinese may be expected very shortly.

Claus Spreckels, Esq., has sent an Agent, Mr. Koopmanchap, per steamer from San Francisco to Hongkong to engage 600 coolies for the islands. The German bark Lasker is 63 days out with

320 Chinese on board, consigned to Sing Chong & Co. The German stmr. Cassandra is due, with 500 Chinese to Hackfeld & Co.

The Hochung is reported to leave Hongkong about this date with 500 Chinese for this port

Epitaph for our cotemporary of the ADVERriskn :- Exegi monumentum aere. Will he kindly translate. - Gazette, Nov. 3. With pleasure. We remember the words in Horace, and venture on this rendering :-

I erected a monument of brass. It may be our brother means a compliment, wishing to associate our name, with an object of our special endeavor-the noble bronze monument of

Or, it may be, he hints at our brazen assurance, in opposing him and his clique. We thank him for his kind thought of our pos-
